UNIFORM CRIME REPORTS

J. Edgar Hoover, Director, Bureau of Investigation

United States Department of Justice

Washington, D. C.

Volume 1

SEPTEMBER, 1930

Number 2

Offenses Known Tabulated for First Three Quarters.

This issue of the bulletin contains a comparative table of offenses known to the police compiled from the monthly returns submitted by cities of over 100,000 population for the period extending from January 1 to September 30, 1930, inclusive.

This period embraces the first three quarters of the current year and the returns are tabulated to show the totals for the first two quarters and those of each of the three months which comprise the third quarter. The bulletin also contains the usual table reflecting the results of crime returns submitted for the month of September by contributing police departments throughout the country and three of the possessions. Reviews of the extent of the crime registration area and of crime trends are also included. Returns from counties in several States are shown, together with supplementary returns from police departments in various States and the possessions.

"Offenses known to the police" include those crimes designated as Part I classes of the uniform classification, occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be the most generally and completely reported: Felonious homicide including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (a) thefts of \$50 and over, and (b) thefts of under \$50, and auto theft.

"Offenses known to the police" include, therefore, all of the above offenses which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

Reporting Area Expands Gradually.

During the current month returns were received from 793 cities located in 44 states, and the District of Columbia. In addition to the data submitted by these police departments, a number of State and county returns have been received. The figures on offenses known to the police contained in these latter reports are exclusive of those reported by police departments.

Current returns were also received from Alaska, Porto Rico, and Hawaii, while returns for previous months were forwarded from Alaska and the Philippines.

The reporting area of cities submitting monthly crime statistics continues to expand gradually. The number of cities contributing in January, 1930, when the system was inaugurated, was 400. With this issue of the bulletin the number of cities which have reported during any one month reached 931, of which the majority are regular contributors.

In the table which follows, the number and per cent of cities now filing crime returns, together with the number and per cent of the population represented, are shown for cities of 25,000 population and over. The classification is based on preliminary figures for cities of 25,000 inhabitants or more, issued during September, 1930, by the Bureau of the Census. These figures are subject to revision in the final count. In addition there are approximately 300 cities of populations from 10,000 to 25,000, with an estimated combined population of 4,500,000, and approximately 345 cities of a population under 10,000, with an estimated total population of 2,000,000, which have contributed returns. The population of the territories and possessions reporting since January is estimated to be approximately 2,000,000.

Population groups	Total number of cities	Cities filing returns		Total population (1930)	Population represented in returns	
		Number	Per cent		Number (1930)	Per cent
Total.....	304	286	76	48,883,174	26,904,801	73
A. Cities over 200,000.....	41	26	88	29,711,511	21,330,419	72
B. Cities 100,000 to 200,000.....	53	47	89	6,782,985	5,062,762	86
C. Cities 50,000 to 100,000.....	97	77	79	6,373,542	5,022,917	79
D. Cities 25,000 to 50,000.....	173	126	73	6,016,136	4,488,705	75

The above table does not include 645 cities of a population less than 25,000, aggregating a total of 6,500,000 from which returns are received.

Officials Requested to Submit Supplementary Returns.

The following table indicates the extent of the reporting area by States, for monthly periods from January to September, 1930, inclusive. This area is maintained by collecting supplementary returns from cities which began contributing subsequent to the first issue of the bulletin. Cities failing to submit returns during any particular month, and cities which commenced contributing after January are requested to send in figures for the missing months. In this manner the reporting area established for the entire period may be maintained. This practice of forwarding supplementary returns is highly desirable. By contributing such returns, cities will assist materially in making available more comprehensive figures for a wide reporting area.

In the table which follows the figures for the months of January to August, inclusive, include all late or supplementary returns for these months, while those for September represent the initial returns only.

Total Volume of Offenses Shows Very Slight Increase.

A comparison of the total of crimes reported for the month of August with the total for the month of September, submitted by comparable cities, indicates a very slight increase in the net volume of offenses for September. Due allowance was made for the fact that the reporting period in August was one day longer than in September.

Monthly Crime Trend Chart.

The chart on the following page is based on comparable monthly crime returns submitted for the period covered, January to September, 1930, inclusive, by 58 cities of the United States with a population of 100,000 and over, according to available 1930 Census Bureau data. The cities included in the chart have furnished complete reports on the offenses indicated for the above period. The chart is based on the average daily number of offenses for each month, rather than the monthly totals of offenses. The crimes included are the offenses in Part I of the Uniform Classification of Offenses.

CHART OF MONTHLY CRIME TRENDS
FOR CITIES OF 100,000 POPULATION AND OVER
JANUARY TO SEPTEMBER 1930

Percentage of Offenses Known Continues Comparatively Stable.

The monthly per cent of each offense class to the whole is shown in the following table. It is based on the totals for all offenses reported, as derived from the returns for January to September, inclusive, 1930.

Per cent of offenses known

Part I classes of the uniform classification	January	February	March	April	May	June	July	August	September
Total.....	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0	100.0

Auto theft.....	24.9	27.0	28.3	28.0	27.9	27.5	25.9	25.0	26.0

Prompt Mailing of Returns Urged.

Officials contributing monthly returns on crime statistics to the Bureau of Investigation are requested to forward the "Return A" as promptly after the close of the month as conveniently possible.

If the bulletin, tally sheet, and "Return A" are not received within a few days after the 1st of each month, this bureau should be notified, and the same will be mailed immediately.

Forwarding the returns on or before the 7th of each month will facilitate the compilation and tabulation of the data.

Part I. COMPARATIVE TABULATIONS

TABLE A.—Recapitulation of known offenses for cities of 100,000 population and over †

[First three quarters, 1930]
